SPRING / SUMMER 2012

# DR. WEIL Recommends

Andrew Weil, M.D., donates all of his after-tax profits from royalties from sales of Orthaheel products directly to the Weil Foundation, a not-for-profit organization dedicated to supporting integrative medicine through training, education and research. For more information, visit [www.weilfoundation.org](http://www.weilfoundation.org)

## Orthaheel® footwear and orthotics help restore natural foot function and well-being with every step.

Our feet were designed to walk on soft, natural surfaces like soil and sand. Yet today we spend most of our time standing, walking and running on unnatural hard, flat surfaces.

This loss of our "footprint" has resulted in a variety of pain and injuries affecting not just the feet, but the entire body. Unnatural surfaces force our feet to pronate (roll over) to gain ground contact, which flattens the arches and can disrupt normal knee function and hip alignment and increase pressure on the lower back.

Clinical research supports Orthaheel's success in restoring the foot's natural (neutral) alignment, enabling the feet, ankles and legs to function dynamically as they were intended. Orthaheel's unique orthotic is built in to our collection of sandals, slippers and athletic shoes.

## Clinically shown to reduce pronation, which can improve foot function and relieve associated heel and ankle pain.

- Podiatrist-designed, clinically shown orthotic support
- Tri-Planar Motion Control system for essential support & stability
- Flexible and lightweight construction
- Supported by our Walk Pain Free Guarantee
